African Secret Working Group

WHO should make it work

Lot of discussions about Internet Standards and regulation

The World Conference on International Telecommunication (WCIT- 2012) will revisit the ITR (International Telecommunication Regulation) in place since 1888

They Want Internet included

Like you, the SWG is concerned

African Secret Working Group

SWG helping the debate

The SWG gave a warning to the Internet Organizations (I*) sometime this year

Met the Secretary General of ITU

Met the I*

Has some advices for the parties

African Secret Working Group

SWG warning to the I*

<http://www.secret-wg.org/files/2012/04/Sint2011.m4v>

African Secret Working Group

SWG MET The SG

Well, welcome to ITU HQ. This place smells Telecoms. No? The I* failed to get IPv6 moving and to secure the core. They refused to include wiretapping in protocols (RFC 2804) and never changed their mind. They provide no tools for the govts to control the social Networks....

Doc,

Why do you want it all. The I* trust you for Layer 1&2, they love too much X509 and happy to collaborate:

E-NUM, MPLS-TP...

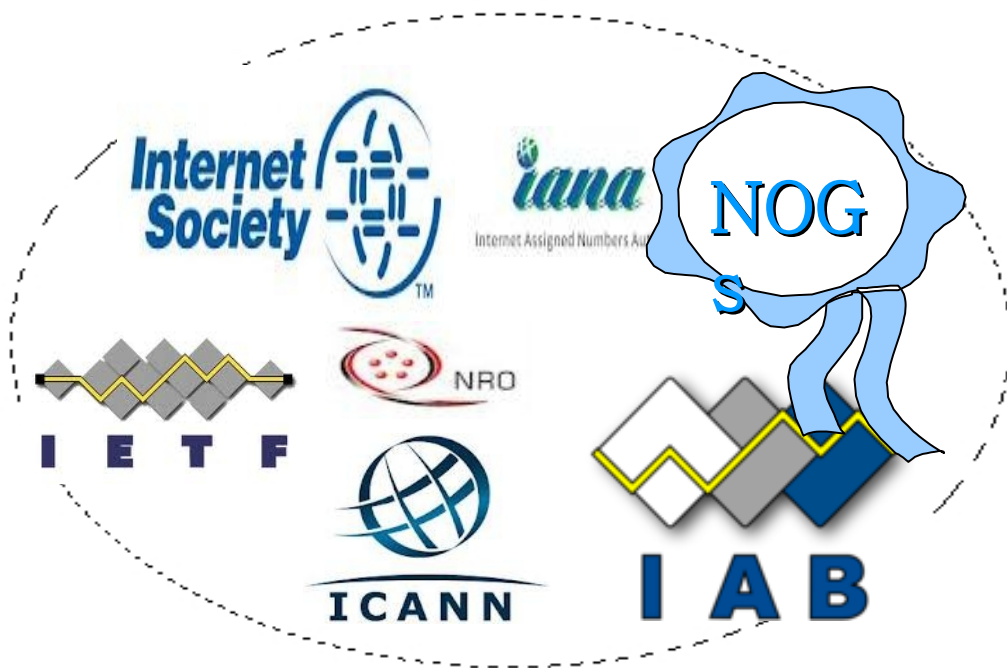

IAB is revisiting RFC3356

(ITU-T/ IETF collaboration).

African Secret Working Group

I* Response

**Internet is not POT'S or PSTN
and telephone regulation can
not apply to the Internet...**

and

**"We reject kings, presidents and voting. We
believe in rough consensus and running code"**

African Secret Working Group

Some Advices

Secret Working Group RFC series
RFC2012
BCP12

African Secret Working Group

Make sure NTIA does the right thing

IETF registries

IPs and ASNs registry

Root zone management

...the Department of Commerce issued a RFP for a new IANA functions contract with a deadline of December 19, 2011. The government may cancel any solicitation that does not meet the requirements. **Accordingly, we are canceling this RFP because we received no proposals that met the requirements requested by the global community.**

African Secret Working Group

The IPv6 launch day

Make it a success by registering your v6 services in the **v6internet.all** zone on the following format:

\$Origin v6internet.all.

;Name	TTL	Class	Type	Rdata
african.secret-wg.org	FOREVER	IN	AAAA	2001::NEVER:TOUCH:AGAIN
www.afnwg.org	FOREVER	IN	AAAA	2002::NEVER:TOUCH:AGAIN

Send your name to dns-for-v6launch@african.secret-wg.org

before 05/30/2012

African Secret Working Group

... sign it and have

v6Internet.all. IN SOA v6-Internet-That-works secret-wg.org.
IN RRSIG SOA 8 3 FOREVER TODAY 23935 v6internet.all

African Secret Working Group

Do them before the ITU WCIT-12 and...

**Still believe in rough consensus and running code,
but allow kings, presidents and learn voting**

**Be conservative in What you do, but liberal in what
you accept.**

Robustness principle.

Address issues before they become problems

African Secret Working Group

....and....

Congratulations for the AFRICA INTERNET SUMMIT Initiative

Looks like you got the Message, don't always use two laptops for your presentation at the SUMMIT, until a new protocol makes it a must

African Secret Working Group

As for ITU.....

They will notice that it is not doable and

Leave it to you, but take care of it.....

African Secret Working Group

Otherwise....

**Secret Working Group will take over and call it
“SINETNET”**

**You will be punished for failure in “future
management”**

**Where is your SFMP (Simple Future Management
Protocol)**

African Secret Working Group

See you at Africa Internet Summit 2013
HOPE YOU WILL SURVIVE
